**Dear Hiring Manager,**

**RE:** Software Engineer Role @ Zomoato

As a Computer Engineering graduate from Trinity College Dublin, I am eager to bring my passion for software engineering to Zomato. I have amassed a range of experiences spanning industries like Energy, Oil, Gas, Software, Location Analytics, and Telecoms. My mastery in Python, C/C++, SQL, XML, and Agile methodologies, developed from these experiences, makes me uniquely positioned to enhance your dynamic team.

At Ericsson, I utilized my strong quantitative abilities to extract valuable insights from extensive datasets and delve into the implementation of machine learning models. The dynamic nature of these tasks required quick adaptation and mastery of skills including Natural Language Processing (NLP), image processing, and data cleansing. These contributions augmented our team's comprehension of data and significantly improved the accuracy of our models.

In my tenure at Baker Hughes, I demonstrated an aptitude for cross-functional collaboration, engaging with a variety of teams on a new product initiative. This project entailed a comprehensive design upgrade and the integration of new features. My focus on outcomes was further evident as I spearheaded a company-wide standardization of tools. This strategic initiative resulted in substantial resource savings across the organization.

In conclusion, my diverse experiences have endowed me with a wide-ranging skill set that includes advanced programming, adept handling of large datasets, and foundational experience with machine learning models. I am also seasoned in cross-functional collaboration, swiftly adapting to new technologies, and have a results-driven approach. These attributes make me an ideal fit for the Software Engineer role at Zomato. I am excited about the prospect of bringing these skills to your team, fostering innovation, boosting efficiency, and contributing to your continued success.

Thank you for considering my application. I look forward to the possibility of contributing to your organization's success.

**Sincerely,**

Rahul Seth
